RISK CONTROL

Quant-Developer

Job Title: Quant-Developer
Working For: Risk Control
Location: West End, London
Salary: Competitive, depending on experience

About

Risk Control Limited is an entrepreneurial risk software and consultancy firm working for leading financial institutions.

We are looking for a quant-developer to work on internal and client risk management modelling projects.

We are a research-led company and the successful candidate may expect to acquire substantial new expertise.

This is an exciting opportunity for somebody wishing to develop a career in the application of mathematical and statistical modelling to finance.

There will be opportunities to interact with clients, assisting them with their risk and valuation problems.

Requirements

- You must have a superior educational track record including an MSc or PhD in a highly quantitative discipline
- You must have experience of programming in Java or C++
- You must have experience of applying numerical or statistical methods to solving problems
- You should have good knowledge of statistics
- Experience of working with economic and/or financial datasets would be an advantage
- Experience of working in a financial institution would be an advantage
- You must be meticulous and precise in your work

Good interpersonal skills are desirable as there will be opportunities to interact with clients.

Interviews will be held on a rolling basis.
Closing date for applications: 3rd December 2015
Please send a cover letter outlining how you meet the specification along with your CV to *admin@riskcontrollimited.com*
