RISK CONTROL

Junior Quant

Job Title: Junior Quant
Working For: Risk Control
Location: Soho, London
Salary: Competitive, depending on experience

About

Risk Control Limited is an entrepreneurial risk software and consultancy firm working for leading financial institutions.

We are looking for a junior quant to work on internal and client-related risk management modelling projects.

We are a research-led company and the successful candidate may expect to acquire substantial new expertise.

This is an exciting opportunity for somebody wishing to develop a career in applications of mathematics and statistics to finance.

Projects on which you would work are extremely varied (covering topics in credit, market, liquidity and operational risk, valuation, financial planning and forecasting).

There will be opportunities to interact with clients, assisting them with their risk and valuation problems.

Requirements

- You must have an outstanding educational track record including an MSc in a highly quantitative discipline from a leading university
- Experience with Matlab, R, Java or C++ or similar programming language would be an advantage
- You must have experience of applying numerical or statistical methods to solving problems
- You should have good knowledge of statistics
- Experience of working with economic and/or financial datasets would be an advantage
- Experience of working in a financial institution would be an advantage
- You must be meticulous and precise in your work
- Good interpersonal skills would be desirable

Closing date for applications: 23rd December 2016

Please send a cover letter outlining how you meet the specification along with your CV to *jobs@riskcontrollimited.com*
