RISK CONTROL

Quantitative Analyst

Job Title: Quantitative Analyst
Working For: Risk Control
Location: Soho, London
Salary: Competitive – Depends on experience
Start Date: Immediate

About

Risk Control is an innovative financial technology company working on highly topical risk and strategy issues with leading banks and investment firms. We develop innovative software for clients that are building new businesses or are seeking to manage better existing complex activities.

We are looking for an Analyst to work on projects involving, among other subjects, credit portfolio modelling, macroeconomic stress testing, loan scoring, statistical modelling of Assets Under Management and operational risk for asset managers.

Requirements

- You must have completed Msc pr Phd in a quantitative discipline
- You should have excellent quantitative skills
- Proficiency in Excel and MS Office is required
- Experience in scientific computing with Matlab, Python, R or some similar programming language is required
- Experience of working with databases using SQL and extracting data from Bloomberg or Reuters would be an advantage
- You must have the right to work in the UK

Interviews will be held on a rolling basis.

Please send a cover letter outlining how you meet the specification along with your CV to admin@riskcontrollimited.com.
