RISK CONTROL

Analyst

Quant Analyst

Working For: Risk Control
Location: Soho, London
Salary: Level depends on experience
Contract: Permanent

About

Risk Control is a specialist provider of technical risk management consulting and software. Risk Control works with major financial institutions worldwide including banks, insurers and asset managers.

We are looking for a Quantitative Analyst to work on projects involving, among other subjects, hedging, derivative pricing, loan valuation, credit portfolio modelling, stress testing, credit scoring, and operational risk.

Requirements

- You must be able to travel internationally on behalf of the company and to work in clients' offices as required
- You must have completed an MSc or PhD in a quantitative discipline
- You are likely to have significant industry experience
- You should have excellent quantitative skills and be familiar with the pricing of derivatives, particularly those related to fixed income securities
- Proficiency in Excel and MS Office is required
- Experience in scientific computing with Matlab, Python, R or some similar programming language is required
- Experience in Java or C++ programming would be an advantage
- Experience of working with databases using SQL and extracting data from Bloomberg or Thomson-Reuters are required
- You must have the right to work in the UK

Interviews will be held on a rolling basis. Closing date for applications: 20th August 2019. Please send a cover letter outlining how you meet the specification along with your CV to *admin@riskcontrollimited.com*.
